### Project and Experience

#### **MIST Billing System**

##### **Project**

2018

Developed an online billing system for student of MIST using PHP and Javascript. It enables to-

- pay their bill online using Mastercard or Visa
- keep track of all the bills by logging into their individual account.

#### **DevHub**

##### **Project**

2019

Developed an online social site to get connected with other developers using MongoDB, Express, React and NodeJS also known as MERN stack. It enables them to-

- create an online portfolio for each individual
- post status on post feed
- like/unlike a post and also comment on them.

## EasyBill

### Project

2019

Developed a web app with MERN stack and Redux to save and generate monthly bill for house renter. It enables to-

- create an individual billing list for each customer/house renter
- generate new bill for all customer
- save all the generated previous bill in database.

## Weather App

### Project

2019

Developed a web app using ReactJS. It enables to-

- view current weather forecast of a city
- view weather forecasts of upcoming 6 days of a certain city
- search preferred city to view forecast.

## Chat App

### Project

2019

Developed a mobile app using React Native, Express/NodeJS and MongoDB. It enables to-

- send message in real time
- view who is typing now
- view real time join or leave notification of a user.

## Smart Question Box

### Project

2018

Developed an IOT based smart question box using Arduino. It enables to-

- track the location of question box via gps
- prevent question leakage by enforcing keypad security system and alert authority via sms.

## Contessa Solutions and Consultants Ltd

### Industrial Training

2017

Got practical experience of solving system vulnerability and how to secure an existing system by means of ethical hacking.

## Certifications

- [MERN Stack Front To Back: Full Stack React, Redux & Node.js](#) - Feb 25 2019, Udemy.

## Skills & Interests
